1	Tanish Khandelwal	201B283		

**Progress made in Previous Week:** For the duration of the previous 3 week, I've completed the basic desktop python app development and created a real-time voice translator. Added support to some Indian regional languages and some standard National languages like Japanese, English, Spanish.

I've achieved the following

- Created a functional python desktop app.
- Added support for multiple languages and can work further.
- One of the applications of this project can be to add support audio input to local LLMs and many open-source LLMs.
