Progress made in Previous Week: For the duration of the previous week, I've successfully created and deployed a python library to add voice and image input support to large language models (LLMs).
I've achieved the following
- Created and published a python library that adds support for audio and image.
- Can be installed and used using `pip install sonus-av`

Link: https://github.com/tknishh/sonus-av
        https://pypi.org/project/sonus-av/

Suggestions by the Supervisor for the next week:
